**TO: PARTIES INTERESTED IN EVALUATION REPORTS ON  
PROPRIETARY CAST-IN-PLACE CONCRETE ANCHOR BOLTS**

**SUBJECT: Proposed New Acceptance Criteria for Cast-in-place Proprietary Bolts in  
Concrete for Light-frame Construction, Subject AC399-0808-R2 (KS/BG)**

Dear Madam or Sir:

The subject new acceptance criteria was posted on our web site on August 1, 2008, for review under the alternative criteria process. The criteria was also sent to the ICC-ES Evaluation Committee for balloting. Two letters from interested parties were received in response to the posting, in addition to the committee ballots. The interested-party letters are now posted along with this staff letter. The letters mainly suggest editorial changes.

Two committee member ballots raised questions on the criteria that need to be resolved. In order to resolve these issues, the criteria will be on the October 22, 2008, ICC-ES Evaluation Committee hearing agenda. Additional staff comments on these issues are noted in a staff letter dated September 19, 2008, which is posted on the ICC-ES web site for the October 2008 hearing in Albany, New York.

Staff intends to prepare a revised draft with a staff memo that addresses the recently submitted letters and the committee concerns. The staff memo will also contain information on any additional comments received in response to the September 19, 2008, staff letter. The staff memo will be available on the ICC-ES web site several days before the October 22, 2008, hearing.

Any responses to this item should reference the September 19, 2008, staff letter.

If you have any questions, please contact the undersigned at (800) 423-6587, at extension 3733, or Brian Gerber S.E., at extension 3275. You may also reach us by e-mail at [es@icc-es.org](mailto:es@icc-es.org).

Yours very truly,

A handwritten signature in black ink that reads 'Kurt Stochlia'.
