

## NOTICE

ICC Evaluation Service, Inc., notes that Engineered Rubber Products (ERP), of West Liberty, Iowa, at several places on its web site ([www.erpiowa.com](http://www.erpiowa.com)), makes reference to ICC-ES evaluation report ER-5969, specifically concerning the roofing products called Simulated Slate, Cedar Shake, and Cienda Tile. The ERP web site also includes a product catalogue in which there is a statement that ERP Simulated Slate is "ICC-ES Approved" under evaluation report ER-5969.

For the record, ICC-ES notes that evaluation report ER-5969 was canceled in December 2004, and that currently there is no valid evaluation report on the products of Engineered Rubber Products.
