**Compliance eligibility with the applicable sections of the following green building rating systems, standards and codes:**

- 2012 International Green Construction Code (IgCC), (see Table 2 for details)
- 2010 California Green Building Standards Code (CALGreen), Title 24, Part 11 (see Table 3 for details)
- National Green Building Standard (ICC 700-2008) (see Table 4 for details)

- LEED 2009 for Schools New Construction and Major Renovations (see Table 7 for details)
- ANSI/GBI 01-2010 – Green Building Assessment Protocol for Commercial Buildings (see Table 8 for details)
- CSI GreenFormat™ (see Table 9 for details)

## 2.0 USES

The products are used for drain waste and vent soil pipe and fittings in the plumbing industry.

## 3.0 DESCRIPTION

The products are grey cast iron pipe and fittings produced in a variety of sizes and shapes. The pipe and fittings contain the minimum type and percentage of recycled content, by weight, as set forth in Table 1.

## 4.0 CONDITIONS

### 4.1 Code Compliance:

See ICC-ES listings [PMG-1079](#) and [PMG-1080](#) for compliance with code requirements.

### 4.2 Green Codes, Standards and Rating Systems Eligibility:

The information presented in Tables 2 through 9 of this report provides a matrix of areas of evaluation and corresponding limitations and/or additional project-specific requirements and offer benefit to individuals who are assessing eligibility for credits or points.

The final interpretation of the specific requirements of the respective green building rating system, standards and/or code rests with the developer of that specific rating system or standard, or the authority having jurisdiction (AHJ), as applicable.

Decisions on compliance for those items noted as “Eligible for Points” in Tables 2 through 9 rests with the user of this report, and those items are subject to the conditions noted. The user is advised of the project-specific provisions that may be contingent upon meeting specific conditions, and the verification of those conditions is outside the scope of this report. Rating systems or standards often provide supplemental information as guidance. Compliance for items noted as “Verified Attribute” are also subject to any conditions noted in the tables.

The total percentage of recycled content reported is based upon assigning an equal value for each type of recycled content used in accordance with IgCC Section 505.2.2, ICC 700 Section 604.1 and ANSI/GBI 01-2010 Section 10.1.2. Where the recycled content values are used for determination of compliance with requirements other than the IgCC, ICC 700 and ANSI/GBI 01, the total percent of recycled content must be calculated in accordance with the percentage requirements stated in that document.

Due to the variability of costs and volume, the recycled content percentage listed in this report is based upon weight (mass). The use of cost or volume as the method for calculation is outside the scope of this report.

## 5.0 BASIS OF EVALUATION

The information in this report, including the “Verified Attribute,” is based upon the following supporting documentation:

- ICC-ES EC101. (Evaluation applies to IgCC Section 505.2.2; CALGreen Sections A.4.405.3 and A5.405.4; ICC 700 Section 604.1; LEED Homes MR Credit 2.2;

LEED NC MR Credit 4; LEED Schools MR Credit 4; ANSI/GBI 01 Section 10.1.2.1 and 10.2.2.1; CSI GreenFormat Section 2.3.3)
