1.0 EVALUATION SCOPE

Compliance with the following codes:

Properties evaluated:
- Light-transmitting plastics
- Interior finish
- Safety glazing (indoor applications only)
- Durability

2.0 USES

All TUFFAK® and Hygard® products comply with the requirements for light-transmitting plastics set forth in IBC Section 2606.4, and have either a CC1 or CC2 classification, as noted in Tables 1, 2, and 3.

2.1 TUFFAK® AR sheets with a minimum thickness of 0.125 inch (3.2 mm) comply with the safety glazing requirements of IBC Section 2406.1.2.

TUFFAK® GP sheets with thicknesses ranging between 0.030 to 0.060-inch-thick (0.76 to 1.5 mm) comply with the interior finish requirements of IBC Section 803.1.

Select TUFFAK® GP, SL, UV, and SK1 sheets may be used in exterior applications.

3.0 DESCRIPTION

3.1 TUFFAK® Products:

The TUFFAK® GP, AR, 15, SL, SK, SK1, and UV are monolithic polycarbonate sheets. The sheets are available in a uniform thickness and in a variety of transparent, and translucent opaque colors and patterns.

The TUFFAK® SK and SK1 are also available with one side prismatic and available in transparent-clear or translucent-white.

The TUFFAK® sheets are manufactured from the same polycarbonate material but have different coatings and surface treatments. The sheets are available in various lengths, with thicknesses as set forth in Tables 1 and 2.

3.2 Hygard® Products:

The Hygard® EX250 and EX525 are clear monolithic polycarbonate sheets of uniform thickness. The Hygard® CG375, CG500, CG750, BR1000, BR1250, EX1100, and EX1300 are clear laminated polycarbonate sheets. The BR750 and MS1250 are clear laminated polycarbonate sheets with an acrylic core. All Hygard® sheets are manufactured from the same polycarbonate material, and the exterior surface has a proprietary hardcoat. The sheets are available in various lengths, with thicknesses as set forth in Table 3.

4.0 DESIGN AND INSTALLATION

4.1 General:

TUFFAK® and Hygard® products must be limited and installed in applications permitted by the IBC. The manufacturer’s published installation instructions and this report must be strictly adhered to.

The prismatic side must be installed facing the interior of the building, as applicable.

4.2 Light-Transmitting Plastics – All TUFFAK® and Hygard® products:

All TUFFAK® and Hygard® products have a self-ignition temperature greater than 650ºF (343ºC) per ASTM D1929; a maximum average smoke density rating less than 75 per ASTM D2843; and a CC1 or CC2 rating per ASTM D635, as noted in Table 1, 2, or 3. Therefore, all products comply with the requirements for light-transmitting plastics per IBC Section 2606.4.

4.3 Interior Finishes – TUFFAK® GP:

4.3.1 Class A:

TUFFAK® GP sheets with a uniform thickness of 0.030 inch (0.76 mm) comply with the requirements for Class A interior finishes per IBC Section 803.1.

4.3.2 Class B:

TUFFAK® GP sheets with a uniform thickness greater than 0.030 inch but less than 0.060 inch comply with the requirements for Class B interior finishes per IBC Section 803.1.

4.4 Safety Glazing – TUFFAK® AR:

The TUFFAK® AR sheets with a minimum thickness of 0.125-inch (3.2 mm) comply with the safety glazing requirements of IBC Section 2406.1.2.
4.5 Exterior Applications – TUFFAK® GP, SL, UV, and SK1:

Application in skylights, exterior walls, and roof sheets is limited to the following TUFFAK® sheets, when specifically recognized in a current ICC-ES report:

- GP sheets with uniform thicknesses from 0.03 to 0.50 inch.
- SL and UV sheets with uniform thicknesses from 0.06 to 0.50 inch.
- SK1 sheets with uniform thicknesses from 0.06 to 0.50 inch.
- SK1 sheets with a prismatic side with thinnest thicknesses from 0.060 to 0.435 inch (overall thickness from 0.125 to 0.50 inch).

5.0 CONDITIONS OF USE

The TUFFAK® and Hygard® products described in this report comply with, or are suitable alternatives to what is specified in, those codes indicated in Section 1.0 of this report, subject to the following conditions:

5.1 The sheets are manufactured, installed and identified as described in this report, the IBC and the manufacturer’s published installation instructions. In the event of a conflict between this report and the manufacturer’s published installation instructions, this report governs.

5.2 Except as provided in Section 4.5, end use of the TUFFAK® and Hygard® products is outside the scope of this report, thereby requiring compliance to the satisfaction of the code official, with requirements of code sections applicable to end use (such as, but not limited to, structural and drop-out performance).

6.0 EVIDENCE SUBMITTED

6.1 Manufacturer’s descriptive literature.

6.2 Reports of tests in accordance with ASTM D2843, ASTM D635, ASTM D1929 and ASTM E84.

6.3 For recognition under the 2018, 2015 and 2012 IBC, reports of weathering tests (ultraviolet-light tests and comparison tension tests) in accordance with Section 4.1.2 of the ICC-ES Acceptance Criteria for Plastic Glazed Skylights (AC16), dated April 2017 (Editorially revised December 2018), on the products specified in Section 4.5.

6.4 For recognition under the 2009 and 2006 IBC, reports of weathering tests (ultraviolet-light tests and comparison tension tests) in accordance with Section A.4.1.2 of the ICC-ES Acceptance Criteria for Plastic Glazed Skylights (AC16), dated April 2011 (Editorially revised August 2013), on the products specified in Section 4.5.

6.5 Reports of tests in accordance with ANSI Z97.1 and CPSC 16 CFR1201 on 0.125-inch-thick (3.2 mm) TUFFAK® AR polycarbonate sheets.

6.6 Quality documentation.

7.0 IDENTIFICATION

7.1 Each polycarbonate sheet or bundle of sheets must be identified by a label bearing the manufacturer’s name (Plaskolite, LLC), the product name (TUFFAK® or Hygard® model name), the CC1 or CC2 plastic classification and the evaluation report number (ESR-2728).

The TUFFAK® AR polycarbonate sheets with a minimum thickness of 0.125 inch (3.2 mm) used as safety glazing in hazardous locations must be legibly and permanently marked in one corner with: ANSI Z97.1-2015 – Indoor Use Only for the 2018 and 2015 IBC, ANSI Z97.1-2009 – Indoor Use Only for the 2012 IBC and ANSI Z97.1-2004 – Indoor Use Only for the 2009 and 2006 IBC; the thickness of the sheet; and the manufacturer’s mark or designation in accordance with Section 6.0 of ANSI Z97.1-2015, ANSI Z97.1-2009 and 2004.

7.2 The report holder’s contact information is as follows:

Plaskolite, LLC

1.0 REPORT PURPOSE AND SCOPE

Purpose:
The purpose of this evaluation report supplement is to indicate that the TUFFAK and Hygard products recognized in ICC-ES master report ESR-2728 have also been evaluated for compliance with the code noted below.

Applicable code edition:
2017 Florida Building Code—Building

2.0 CONCLUSIONS

The TUFFAK and Hygard products described in Sections 2.0 through 7.0 of the master evaluation report ESR-2728 comply with the Florida Building Code—Building, provided the design and installation are in accordance with the 2015 International Building Code® provisions noted in the master report.

Use of the TUFFAK and Hygard products for compliance with the High-Velocity Hurricane Zone provisions of the Florida Building Code—Building has not been evaluated and is outside the scope of this evaluation report.

For products falling under Florida Rule 9N-3, verification that the report holder’s quality-assurance program is audited by a quality-assurance entity approved by the Florida Building Commission for the type of inspections being conducted is the responsibility of an approved validation entity (or the code official when the report holder does not possess an approval by the Commission).

This supplement expires concurrently with the master report, reissued October 2019.
