DIVISION: 06 00 00—WOOD, PLASTICS AND COMPOSITES  
Section: 06 50 00—Structural Plastics  
REPORT HOLDER:  
INTEPLAST GROUP CORPORATION  

EVALUATION SUBJECT:  
INTEPLAST BUILDING PRODUCTS DECK X-STRONG (INTEPLAST® DECK X-STRONG), INTEPLAST BUILDING PRODUCTS DECK (INTEPLAST® DECK), AND INTEPLAST BUILDING PRODUCTS PORCH (INTEPLAST® PORCH)  

ADDITIONAL LISTEE:  
THE WOLF ORGANIZATION, LLC  
PRODUCT NAMES: WOLF DECKING (INTEPLAST® DECK) AND WOLF PORCH (INTEPLAST® PORCH)  

1.0 EVALUATION SCOPE  
1.1 Compliance with the following codes:  
- 2013 Abu Dhabi International Building Code (ADIBC)†  
  †The ADIBC is based on the 2009 IBC. 2009 IBC code sections referenced in this report are the same sections in the ADIBC.  

Properties evaluated:  
- Structural  
- Durability  
- Surface-burning characteristics  

1.2 Evaluation to the following green code(s) and/or standards:  
- 2019 California Green Building Standards Code (CALGreen), Title 24, Part 11  

Attributes verified:  
See Section 3.1  

2.0 USES  
The Inteplast Building Products Deck X-Strong (Inteplast® Deck X-Strong) Inteplast Building Products Deck (Inteplast® Deck), and Inteplast Building Products Porch (Inteplast® Porch) boards described in this report are limited to use as flooring boards for exterior balconies, porches and decks in buildings of Type V-B (IBC) construction or buildings constructed in accordance with the IRC. Inteplast® Deck X-Strong boards and Inteplast® Deck boards can also be used as stair treads where indicated in Table 2.  

3.0 DESCRIPTION  
3.1 General:  
The Inteplast® Deck X-Strong and Inteplast® Porch boards are rectangular in cross section, and are co-extrusions of capstock and cellular PVC core produced in accordance with the approved quality control manual. The Inteplast® Deck X-Strong boards are available in solid and grooved profiles. The boards have a wood grain textured finish and are 1 inch (25.4 mm) thick by 51/2 inches (140 mm) wide, with slightly rounded corners. The boards are available in the colors of Sage, Grey, Sahara, Oxford Brown, Expresso, Chestnut, Terracotta, Charcoal, Burnished Maple, Warm Walnut, Slate, Ebony, Sequoia, Grey Walnut, Hickory, Red Cedar, and Acorn. See Figure 1 for typical cross sections of Inteplast® Deck X-Strong boards.  

The Inteplast® Porch boards are tongue and groove boards that are 1 inch (25.4 mm) thick by 31/2 inches (88.9 mm) wide. The boards are capped and are available in the colors of Acorn, Burnished Maple, Gray Walnut, Gray, Harbor Grey, Sand Castle, Weathered Ipe, and Amberwood. See Figure 2 for a typical cross section.  

The Inteplast® Deck boards are rectangular in cross section, and are coextrusions of capstock and a cellular PVC core. The Inteplast® Deck boards are available in a solid profile. The boards are 1 inch (25.4 mm) thick by 51/2 inches (140 mm) wide. The boards are available in the colors of Alder, Acorn, Sage, Sahara, Gray, Sandalwood, Espresso, Hickory, Gray Walnut, Burnished Maple, Warm Walnut, Red Cedar, Brazilian Teak, Grey Oak, Cherry, Driftwood, Pecan, Ash, Shady Oak, Driftwood Grey, Harbor Grey, Sand Castle, Teakwood, Cypress, Silver Teak, Black Walnut, Amberwood, Weathered Ipe, and Rosewood. See Figure 1 for a typical cross section.  

The attributes of the deck boards have been verified as conforming to the provisions of (i) CALGreen Section A5.406.1.2 for reduced maintenance; (ii) ICC 700-2015 and ICC 700-2012 Sections 602.1.6 and 11.602.1.6 for termite-resistant materials and Sections 601.7, 11.601.7, and 12.1(A).601.7 for site-applied finishing materials; and (iii) ICC 700-2008 Section 602.8 for termite-resistant materials and Section 601.7 for site-applied finishing materials. Note that decisions on compliance for those
4.0 DESIGN AND INSTALLATION

4.1 General:
The Inteplast® Deck X-Strong, Inteplast® Deck, and Inteplast® Porch boards must be installed in accordance with the manufacturer’s published installation instructions, subject to the conditions of use in this report. A copy of the manufacturer’s published installation instructions must be available on the jobsite at all times during installation.

4.2 Deck Boards:
Design loads imposed on the Inteplast® Deck X-Strong, Inteplast® Deck, and Inteplast® Porch boards must be limited to the allowable capacities shown in Table 1. The boards must be installed perpendicular to the supporting construction, which is limited to a maximum spacing as prescribed in Table 1. Boards must be spaced at edges and ends in accordance with the manufacturer’s published installation instructions.

4.3 Deck Boards Used as Stair Treads:
The Inteplast® Deck X-Strong boards and Inteplast® Deck boards, when used as stair treads, are sufficient to resist the code-prescribed concentrated load of 300 lbf (1.33 kN) when installed in at least a two-span continuous condition with a maximum center-to-center spacing of supporting construction as indicated in Table 2. Inteplast® Deck boards are limited to residential use when used as stair treads.

4.4 Fasteners:
The Inteplast® Deck X-Strong and Inteplast® Deck solid boards must be fastened with two No. 7 by 21/4-inch-long (57 mm) stainless steel deck screws or stainless steel wood screws or the Tiger Claw TC-3S Hidden Fastener System at each supporting wood member. Stair treads must be fastened along the risers with the deck screws or wood screws as required for the deck boards. When using the screws, the screws must be positioned within 3/8 inch to 1 inch (19 to 25 mm) of the board edge and 1 1/2 inch (13 mm) from board ends. The Inteplast® Deck X-Strong grooved boards must be installed using the TC-G hidden fastener system by Tiger Claw Hidden Deck Fasteners or two No. 8 by 21/2-inch-long (64 mm) stainless steel deck screws at each supporting wood member. The allowable uplift using the TC-3S hidden fastener system or the TC-G hidden fastener system is 100 psf. The Inteplast® Porch boards must be installed with a minimum No. 7 by 21/4-inch-long (57 mm) stainless steel trim head screws in accordance with the manufacturer’s installation instructions.

5.0 CONDITIONS OF USE
The Inteplast® Deck X-Strong boards, Inteplast® Deck boards and Inteplast® Porch boards described in this report comply with, or is a suitable alternative to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

5.1 The Inteplast® Deck X-Strong board is limited to exterior use as flooring for balconies, porches, decks and stair treads of buildings of Type V-B (IBC) construction or buildings constructed in accordance with the IRC.

5.2 The Inteplast® Porch board is limited to exterior use as flooring for balconies, porches and decks of buildings of Type V-B (IBC) construction or buildings constructed in accordance with the IRC.

5.3 The Inteplast® Deck board is limited to exterior use as flooring for balconies, porches and decks of buildings of Type V-B (IBC) construction or buildings constructed in accordance with the IRC and stair treads of residential buildings of Type V-B (IBC) construction or buildings constructed in accordance with the IRC.

5.4 Installation must comply with this report, the manufacturer’s published instructions and the applicable code. When the manufacturer’s published installation instructions conflict with this report, this report governs.

5.5 The use of Inteplast® Deck X-Strong, Inteplast® Deck, and Inteplast® Porch boards as a component of a fire-resistance-rated assembly is outside the scope of this report.

5.6 The compatibility of the fasteners with the supporting construction, including chemically treated wood, is outside the scope of this report.

5.7 The Inteplast® Deck X-Strong, Inteplast® Deck and Inteplast® Porch boards must be directly fastened to supporting construction. Where required by the code official, engineering calculations and construction documents consistent with this report must be submitted for approval. The calculations must verify that the supporting construction complies with the applicable building code requirements and is adequate to resist the loads imparted to it from the products discussed in this report. The documents must contain details of the attachment to the supporting structure consistent with the requirements of this report. The documents must be prepared by a registered design professional where required by the statutes of the jurisdiction in which the project is to be constructed.

5.8 The Inteplast® Deck X-Strong, Inteplast® Deck, and Inteplast® Porch boards are produced in Lolita, Texas, under a quality control program with inspections by ICC-ES.
6.0 EVIDENCE SUBMITTED
Data in accordance with the ICC-ES Acceptance Criteria for Deck Board Span Ratings and Guardrail Systems (Guards and Handrails) (AC174), dated January 2012 (editorially revised December 2014).

7.0 IDENTIFICATION
7.1 Each board or package of boards described in this report must be identified by a label bearing the Inteplast Group Corporation name and address, the Inteplast® Deck X-Strong, Inteplast® Porch (Wolf Porch), or Inteplast® Deck (Wolf Decking), the span rating for use as a deck board, the allowable span when used as a stair tread and the evaluation report number (ESR-2824).

### TABLE 1—DECK BOARD SPAN RATING

<table>
<thead>
<tr>
<th>PRODUCT NAME</th>
<th>MAXIMUM SPAN¹ (in.)</th>
<th>ALLOWABLE CAPACITY² (lbf/ft²)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inteplast® Deck X-Strong Board (solid or grooved)</td>
<td>16</td>
<td>100</td>
</tr>
<tr>
<td>Inteplast® Porch Board</td>
<td>16</td>
<td>100</td>
</tr>
<tr>
<td>Inteplast® Deck Board (solid only)</td>
<td>16</td>
<td>100</td>
</tr>
</tbody>
</table>

For SI: 1 inch = 25.4 mm; 1 lbf/ft² = 47.9 Pa.

¹Maximum span is measured center-to-center of the supporting construction.
²Allowable capacity is adjusted for durability. No further increases are permitted.

### TABLE 2—MAXIMUM STAIR TREAD SPAN³

<table>
<thead>
<tr>
<th>DECK BOARDS USED AS STAIR TREADS</th>
<th>MAXIMUM SPAN¹² (in.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inteplast® Deck X-Strong Board (solid or grooved)</td>
<td>12</td>
</tr>
<tr>
<td>Inteplast® Deck Board (solid only)</td>
<td>12³</td>
</tr>
</tbody>
</table>

For SI: 1 inch = 25.4 mm; 1 lbf/ft² = 47.9 Pa.

¹Maximum span is measured center-to-center of the supporting construction.
²Based on a minimum continuous two-span installation.
³Limited to residential construction (See Section 4.3).
